**Research Interests**

I am interested in exploring topics related to **humans collaborating with generative AI** or **explainable AI**. I am comfortable working with **language models** and **computer vision models**, designing and executing **user studies, surveys, and interviews**; building **low-fidelity prototypes in Figma** and **interactive tools using Svelte**; conducting **qualitative** and **quantitative** analyses (i.e., thematic analysis, hypothesis testing); empirical analyses of vision architectures in PyTorch; analyzing large datasets using **Python** or **R**.

**Education**

**Carnegie Mellon University**, Pittsburgh, PA — 08/2021 - 05/2026
Ph.D. in Human-Computer Interaction (QPA: 4.09)

**University of Pittsburgh**, Pittsburgh, PA — 08/2018 - 05/2021
B.S., Computer Science & Certificate in Sustainability (GPA: 3.77/4.00) - *Summa Cum Laude*

**Moravian College**, Bethlehem, PA — 08/2017 - 05/2018
General Education Studies

**Research Experience**

*Doctoral Research Assistant*, **Carnegie Mellon University** — 08/2021 - present
My research focuses on improving **human-AI collaboration** with **Generative AI** by investigating reliance on AI and the impact of eXplainable AI (**XAI**). My research has focused on **language models explaining image classifications** in high-stakes decision-making domains. I have also worked with NGOs to enhance transparency in their tools. Advised by Adam Perer.

*Human-Centered Generative AI Research Intern*, **IBM Research** — 05/2024 - 08/2024
More details to come soon! Will be advised by Justin Weisz and members on his team.

*Ph.D. Research Intern*, **Microsoft Research** — 05/2022 - 08/2022
Used mixed methods and self-assessment methodology to understand how workers interact with an AI-powered email-based reminder system. Created a prototype in Figma based on study findings and conducted think-aloud studies. Advised by Eric Horvitz and Shamsi Iqbal.

*Undergraduate Research Intern*, **Microsoft Research** — 05/2021 - 08/2021
Conducted surveys on MTurk to understand how people attribute trust and quality to opinion vs non-opinion news articles. Created metrics to represent trust and quality of articles to analyze responses. Advised by David Rothschild.

*Undergraduate Research Fellow*, **University of Pittsburgh** — 01/2021 - 05/2021
Conducted exploratory data analysis, interviewed a bike sharing program director, and evaluated how social, infrastructural, and spatial features impact the prediction of bike demand.

*Undergraduate Research Assistant*, **Carnegie Mellon University** — 08/2020 - 05/2021
Created an Android application that collects and labels IMU sensor and video data when it detects that the user is in a vehicle. Advised by Mayank Goel.

*Data Science Intern*, **IQT Labs** 06/2020 - 08/2020

Enabled "information epidemiology" by making an interactive Plotly Dash App to explore the life cycle of a claim or narrative about COVID-19 on Twitter using a spatial-temporal visualization. Advised by Nina Lopatina.

*Undergraduate Research Assistant*, **University of Pittsburgh** 08/2019 - 10/2020

Worked on an interdisciplinary team to design an open source system on a Raspberry Pi that non-invasively calculates thoracic rotation range of motion using basic computer vision techniques. Advised by William Clark.
